Mounting bracket for suspension wire

The light line fulfils two functions: first, it provides a sturdy in-line mounting rail on which to fix the electrical units, and second, it provides a housing for the electrical cables that bring power to the units. For suspended light lines, the light-line sections are connected using the integrated electrical connector and a sturdy external mechanical coupling piece (accessory). Surface-mounted light lines use the same integrated electrical connector and an internal coupler (accessory). On the upper part of the light-line section, special knock-out openings enable cable entry wherever needed. The basic accessories of Maxos TL-D trunkings can also be used for the TL5 trunkings.

Product data

General information	
Protection class IEC	-
Suspension accessories	MB-SW [Mounting bracket for suspension wire]
Mechanical accessories	No [-]
Packaging configuration	No [-]
Accessory colour	Silver
Emergency lighting accessories	No [-]
